Saving Energy – helping the planet!

It would be helpful if, on a day-to-day basis we could all be mindful of general wastage from water and electricity through to resources etc.

Below are some tips and suggestions that may mean we go some way to help saving the planet!

Please note: Chambers recycling, (who are responsible for our waste disposal) recycle all of our paper, tins, plastic etc.

- Ensure that the hot water heater is switched off at the end of each day
- Ensure that the photocopier is turned off at the end of each day
- Ensure that classroom lights are switched off when they're not required – when outside playing for example
- Ensure that classroom appliances – CD players for example and switched off at the wall when not in use
- Ensure that computers are switched off at the wall when not in use
- Be practical when it comes to washing dishes. If using the dishwasher, make sure that it is full before it goes on. If hand-washing dishes, start with things that aren't as dirty and work up to the mucky ones ;-)
- Try and use a little less paper towels for hand drying...and encourage the children to do so too!

This list is not exhaustive! If you can think of anything else we can do, please let Suzanne / Andi know.

If we do a little, it will help a lot ☺
